- **Programming Languages:** PHP (OOP), JavaScript (ES6+), HTML5, CSS3.
- **Frameworks & Libraries:** Twig, Timber, React.js, Bootstrap, Tailwind CSS.
- **CMS:** WordPress (Custom Themes, Plugins), WooCommerce, REST API
- **Tools & DevOps:** Docker, Git/GitHub, Heroku, AWS, WebSockets, Pusher
- **Databases:** MySQL, PostgreSQL, MongoDB

Education and Certifications

- **B.Sc./B.Ed. Education and Biology,** University of Ibadan, Nigeria.

2024 – 2027

Projects

E-commerce chat backend. [Chat.backend](#)

Built a scalable, real-time chat backend built for e-commerce platforms using Node.js, Express, MongoDB, and Socket.IO.

- Enabled instant messaging for customers and support agents using WebSockets in a modular, maintainable architecture.
- Designed a modular, maintainable architecture supporting high concurrency and secure chat sessions.
- Designed a MongoDB schema to handle chat history, user sessions, and message delivery efficiently.

Youtube Clone Interface. [YouTube.Clone](#)

Developed a fully responsive website optimized for both desktop and mobile devices with HTML5 , CSS3, Flexbox & Grid.

- Ensured cross-browser compatibility and a clean, user-friendly interface for an optimal user experience.
- Implemented semantic HTML and accessibility best practices to improve usability and SEO.
- Optimized assets and layouts for performance, reducing load times and improving responsiveness across devices.

React Application — Data-Grid Interface. [React.App](#)

Developed React application showcasing how to build a simple data-grid interface using Material-UI and Create React App.

- Built modular components – `Data.jsx`, `DatagridToolbar.jsx`, `DataItem.jsx`, for a clean, maintainable UI structure.
- Implemented a sample dataset to demonstrate dynamic rendering and interactive table features.
- Applied component-based design principles to ensure reusability and scalability.
- Optimized the UI for responsiveness and accessibility, creating a user-friendly experience across devices.
